SUMMARY

Software Engineering graduate from Milwaukee School of Engineering with a Data Science minor and honors recognition, bringing hands-on experience across full-stack development, backend APIs, data pipelines, cloud services, testing, and AI-assisted engineering.

Built and supported customer-facing applications, Python data workflows, REST services, and cloud projects through two engineering internships, a year-long senior design project, and a technical portfolio. Comfortable translating ambiguous requirements into maintainable software, debugging across the stack, collaborating in Agile teams, and working independently in remote environments.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, Ruby, SQL, C++, C, C#, R, Rust, HTML, CSS, PHP

Frontend: React.js, JSX, JavaScript, Bootstrap, responsive web development, HTML5, CSS3

Backend and APIs: Node.js, Express.js, Flask, Spring Boot, Ruby on Rails, REST APIs, JSON, server-side logic, validation, data transformation

Data: SQL, MySQL, MongoDB, relational databases, NoSQL, schema design, data modeling concepts, Pandas, data validation, data profiling

Cloud and DevOps: AWS Lambda, AWS SQS, Microsoft Azure, Docker, Linux, Git, GitHub, GitLab CI/CD, deployment fundamentals

Testing and Practices: Unit testing, integration testing concepts, Pytest, Selenium, debugging, root cause analysis, code reviews, Agile/Scrum, technical documentation

AI-Assisted Development: Claude, Claude Code concepts, Codex, Cursor, ChatGPT, Microsoft Copilot, Google AI Studio, code review and validation

ENGINEERING/INTERNSHIP EXPERIENCE

Data Science Practicum Intern | Regal Rexnord / MSOE, Milwaukee, WI (Remote) | Jan 2026 - May 2026

- Built Python data-processing pipelines to extract, structure, validate, and reconcile industrial catalog data from multiple sources.
- Designed structured schemas and Pandas comparison logic to support repeatable analysis, data integrity checks, and reliable downstream outputs.
- Performed data profiling and root cause analysis on inconsistent records, testing proposed fixes before producing final results.
- Worked independently in a remote environment and communicated technical findings and workflow decisions to technical and non-technical partners.

Software Developer Intern (Software Development Lab) | Scot Forge / MSOE, Remote | Sep 2024 - May 2025

- Built and maintained full-stack features for a customer-facing Part Creation Tool, developing React.js frontend components and backend API services connected to MongoDB.
- Used JavaScript, Python, JSON, validation, and server-side logic to support evolving requirements and user workflows.
- Clarified changing requirements with engineers and a Scot Forge product owner, identified edge cases, and translated business needs into implementation plans.
- Debugged application issues across the stack and contributed to Docker deployment, GitLab CI/CD workflows, code reviews, sprint planning, and daily standups.

PROJECT EXPERIENCE

TTS API Server with Meta MMS Foundational Model | Senior Design Project

- Designed and deployed a Python Flask REST API that exposed a foundational AI model as a callable backend service within a larger multi-component application.
- Integrated the service into a collaborative digital audio workstation environment and resolved cross-component communication issues involving Python and C++ systems.
- Worked on a five-person engineering team across system integration, testing, technical documentation, debugging, and final delivery.

AWS Prime Number Determinator Application

- Built a Python application using AWS Lambda and SQS to process large-number calculations through asynchronous cloud services and message queues.
- Applied modular design, cloud deployment concepts, structured debugging, and scalable backend patterns.

React.js Personal Portfolio Website

- Designed, built, tested, and deployed a responsive React.js website using JSX, JavaScript, HTML, and CSS with modular components and GitHub Pages.

Raspberry Pi Real-Time Robot Control System

- Designed and implemented a C++ real-time embedded control system, applying structured problem solving and performance-aware software design.

WORK EXPERIENCE

Deli Associate | Sendik's Food Market, West Bend, WI | Mar 2022 - Jan 2026

- Worked in a high-volume customer service environment requiring accuracy, dependable follow-through, and calm communication under pressure.
- Balanced multiple priorities while maintaining consistent execution, attention to detail, and reliable support for coworkers and customers.

Front Desk Worker / Student Assistant | Milwaukee School of Engineering, Milwaukee, WI | Mar 2023 - May 2024

- Served as a first point of contact for visitors and faculty, handling questions, scheduling, and communications professionally.
- Managed daily administrative responsibilities while balancing academics, demonstrating organization, prioritization, and clear written updates.

Full-Service Gas Station Attendant | Herrige's Oil / Mike's Auto, Kewaskum, WI | Nov 2018 - Dec 2021

- Delivered dependable customer service while managing multiple responsibilities in a fast-paced setting.
- Built habits of accuracy, accountability, independent execution, and practical problem solving.

EDUCATION

Milwaukee School of Engineering (MSOE), Milwaukee, WI

Bachelor of Science in Software Engineering, Honors | Data Science Minor | Graduated May 2026 | GPA: 3.35

ACHIEVEMENTS

- Dean's List during junior and senior years.
- Honors status during sophomore year.
- Google Cybersecurity Professional Certificate, in progress.

CO-CURRICULAR INVOLVEMENT/COMMUNITY SERVICE

- MSOE Concert Band Member (2022-2026)
- MSOE Video Game Development Club Member (2023-2026)
- MSOE Circle K Member (2023-2026)
- Salvation Army Bell Ringing Member (2018-Present)
